

AGRO-CULTURE LIQUID FERTILIZERS
PRESENTS

FARMGUY

Remember,
It's Nutrients,
Not Numbers!

RESPONSIBLE NUTRIENT MANAGEMENT[®] *Foundation*

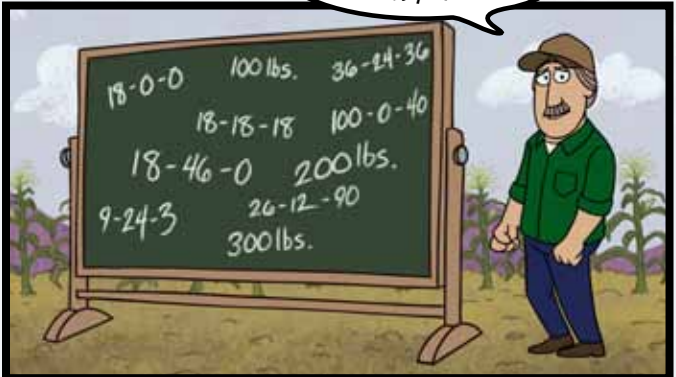

Agro-Culture Liquid Fertilizers manufactures and markets an entire line of fertilizers formulated with scientifically based recommendations to help growers achieve the best possible yields and crop quality while employing sustainable agricultural practices.

For decades Agro-Culture Liquid Fertilizers has worked years ahead of the industry in response to the demand for environmentally friendly products. Advanced crop fertility products and agricultural practices grow from intense agronomic research and applied technology.

Agro-Culture Liquid Fertilizers owns and operates the 462-acre North Central Research Station where thousands of replicated plots prove the company's products and recommendations.

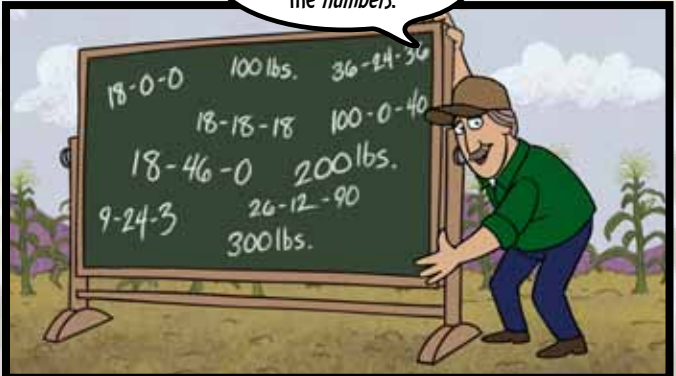

Responsible Nutrient Management emphasizes the application of more usable plant food and in smaller quantities; by stressing the importance of balanced formulations that include micro nutrients, precision placement, and prescription programs, Agro-Culture Liquid Fertilizers achieve the same, and often better, results.

What's *your* fertilizer plan this year?

18-0-0 100 lbs. 36-24-36
18-18-18 100-0-40
18-46-0 200 lbs.
9-24-3 26-12-90
300 lbs.

Ya know ... it's not about the *numbers*.

18-0-0 100 lbs. 36-24-36
18-18-18 100-0-40
18-46-0 200 lbs.
9-24-3 26-12-90
300 lbs.

It's about the **nutrients!**

IT'S NUTRIENTS
NOT
NUMBERS

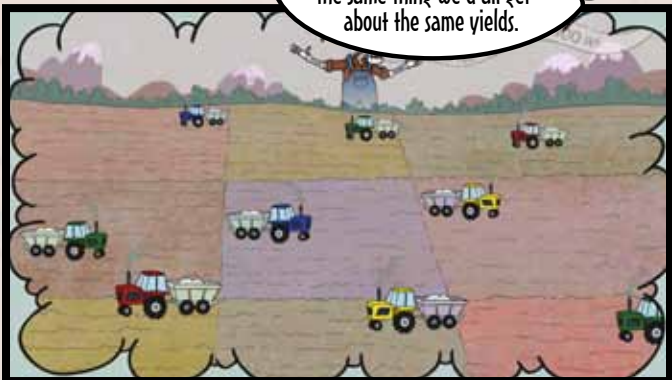

That was me 5 years ago.
Listening to the voices of
farmers past.

My
neighbors too, every year
... everybody was puttin'
down the same application.
Some fields did good. Some
fields... not so good.

Seemed strange.
You'd think since we all did
the same thing we'd all get
about the same yields.

... but nothing any different than before.

But I kept hearing about Agro-Culture Liquid Fertilizers. So I gave 'em a call."

Hi, I'm your local Agro-Culture Liquid Fertilizers professional.

I think we can help!

He said it's not about the numbers.

Uh oh!

It's about the nutrients. Because every field, even two fields right next to each other, can have different nutrient needs.

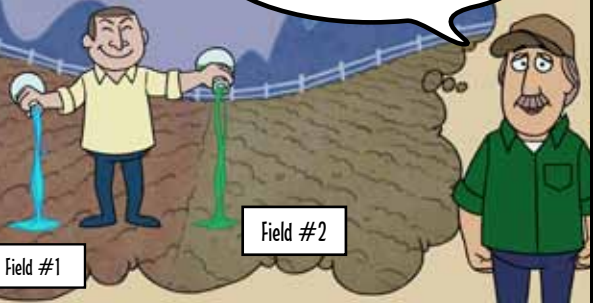

He also showed me that not all fertilizer products are made the same way

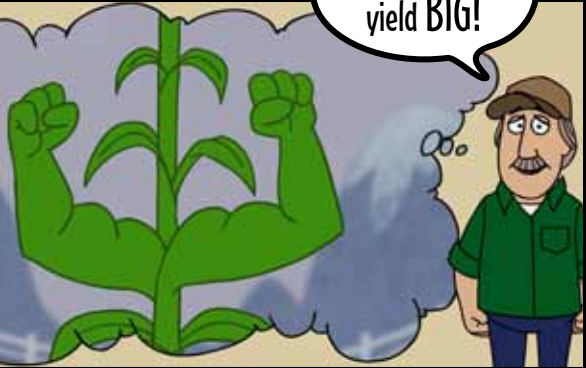

.... and how Agroliquid fertilizers are customized for every field!

With Agroliquids fertilizers you can feed each crop the exact balance of all the nutrients it needs ...

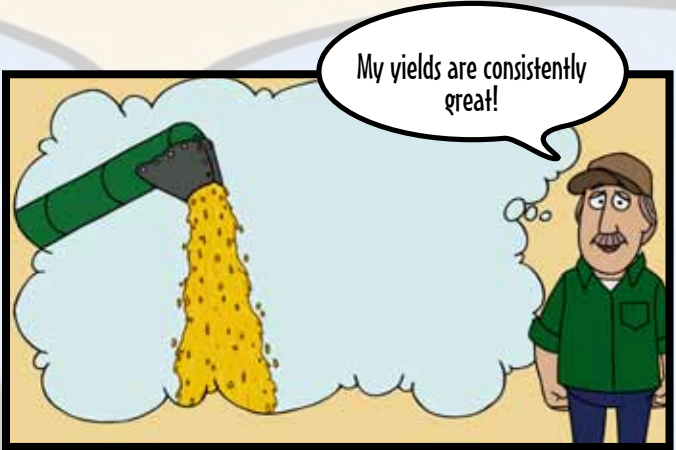

... to yield BIG!

This is my third season now with Agro-Culture Liquid Fertilizers.

My yields are consistently great!

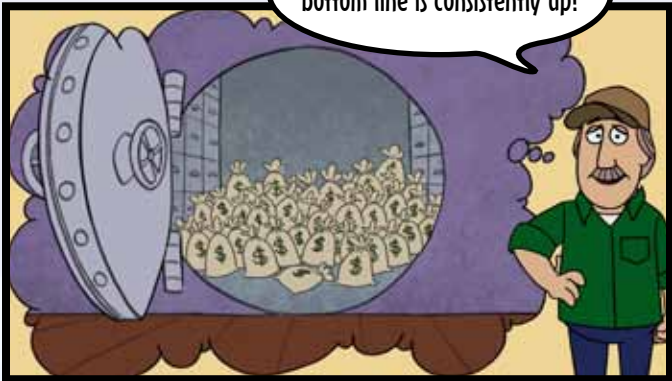

Each field is producing to its potential.

My total production costs have gone down . . .

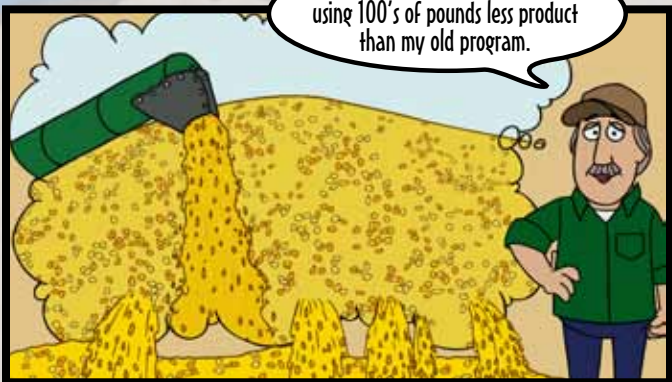

... and my
bottom line is consistently up!

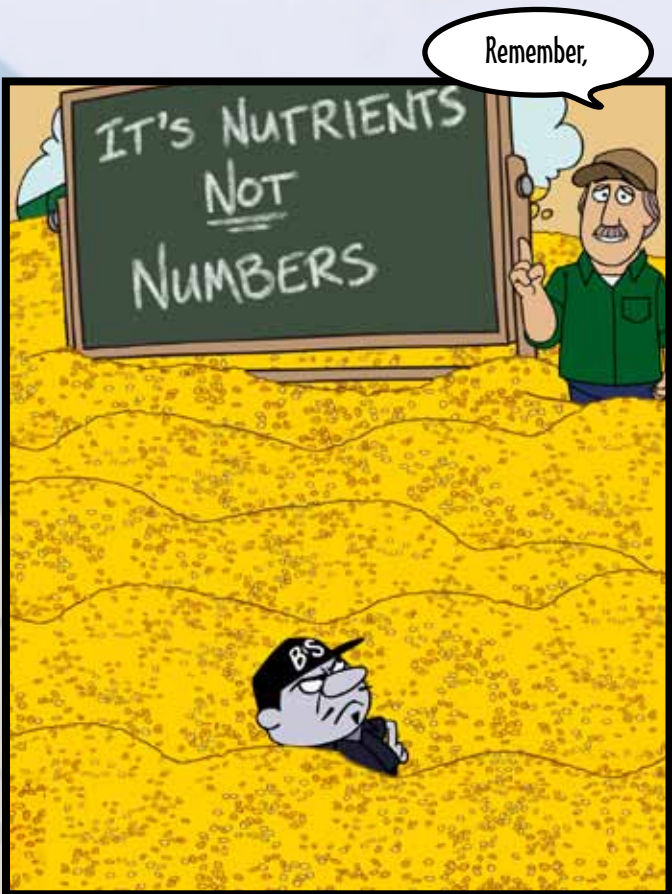

Plus I'm
giving my crops exactly the
nutrients they need . . .

. . . and I'm
using 100's of pounds less product
than my old program.
