

Fase2 is a proprietary foliar fertilizer specifically formulated for orchard use to increase terminal and lateral extension and to stimulate fruit set.

During 2011: 2 year & 4 year old cherry trees in Traverse City area were assessed for trunk diameter & height in response to multiple applications of Fase2. Trunk diameter increased greatly with Fase2 even though these trees started with smaller caliper.

Fuji

Red Delicious

Trunk diameter increased more with Fase2, even when the Red Delicious trees started with smaller caliper.

Central PA
6" above soil line – Average of 5 trees per treatment
4 application of Fase 2 @ 2 qt/A - Monthly
